📄 SUMMARY

Staff Software Engineer specializing in backend and distributed systems, with 13+ years shipping multi-tenant SaaS and cross-platform mobile at scale. Currently focused on agentic engineering building AI-powered developer tooling, including an "Agentic software factory" that generates applications directly from PRDs. Expertise in Spring Boot, NestJS, and event-driven architecture on AWS. Led teams of up to 8 engineers, setting standards for system design, clean architecture, and code review.

🧠 SKILLS

Agentic Engineering: Agentic workflows, Multi-agent orchestration, LLM API integration (Google Gemini), Prompt engineering, AI summarization, AI-assisted development (Claude Code, Warp)

Programming

Languages: TypeScript, Java, Kotlin, Dart, Swift

Backend & Data: NestJS, Spring Boot, REST APIs, Microservices, Apache Kafka, Debezium, TypeORM, PostgreSQL, Elasticsearch

Mobile: Android SDK, iOS SDK, Flutter, Firebase, Couchbase Lite, SQLite

Cloud & DevOps: AWS (EC2, RDS, S3, SQS, Lambda, SES, CloudFront, Route 53), Docker, GitHub Actions

📁 WORK EXPERIENCE

Staff Software Engineer 02/2024 – present | Remote
Particle41

- Built AI-powered developer tooling, an "Agentic software factory" that generates applications directly from PRDs, plus AI summarization and Jira task automation, sharply cutting manual planning and triage.
- Led backend architecture and delivery for two multi-tenant SaaS products (Synemi and Nigel), directing a team of up to 7 and setting clean-architecture and test-coverage standards.
- Designed event-driven services on AWS (SQS/Lambda) for chat, email, and push notifications, and owned PostgreSQL schema, migrations, and financial features (subscription billing, credit balances, A/R aging).

Tech Lead, Soomuch.ai 02/2023 – 02/2024 | Remote
• Built the core database, REST APIs, and Flutter mobile app for Soomuch.ai, India's first multi-module SaaS business ecosystem for educational institutions.

Tech Lead, YUJ Designs 03/2022 – 02/2023 | Remote
• Led Android and iOS development of the MyCitröen connected-vehicle app, in collaboration with Tata Elxsi.
• Re-architected the iOS network layer to add refresh-token authentication.
• Authored security, requirements, and SDLC documentation to pass the Thales security audit.

Tech Lead 07/2017 – 02/2022
Netrix Worldwide Pune, Maharashtra
• Built a cross-platform SIP/VoIP client for Android and iOS using Linphone, Couchbase Lite, and REST APIs.
• Developed a Spring Boot microservice with Apache Kafka to process real-time call data and audio recordings.
• Built a Java/Spring Boot reporting service backed by Elasticsearch.

Tech Lead 04/2013 – 07/2017
Ecosmob Technologies Ahmedabad, Gujarat
• Led an 8-member team delivering concurrent client projects across telecom, education, sports, and productivity domains.
• Owned requirement analysis, project estimation, and technical coordination with cross-functional teams.

EDUCATION & CERTIFICATIONS

Udacity,

Android Developer Nanodegree

04/2016 - 08/2016 | Remote

- Awarded a Tata Trusts and Google India scholarship for the Udacity Android Developer Nanodegree.
- Selected among the top 50 participants for the Android Career Summit at Google, Bangalore (Sep 2016).

L. D. College of Engineering (GTU), M.E. in IT

2013 - 2015 | Ahmedabad, Gujarat

L. D. College of Engineering (GTU), B.E. in IT

2009 - 2013 | Ahmedabad, Gujarat

- Cleared the Graduate Aptitude Test in Engineering exam with 98% percentile in 2013

PROJECTS

Synemi - HoA Management Platform  08/2025 - Present
Synemi is a multi-tenant community and association management platform.
NestJS, TypeScript, PostgreSQL, TypeORM, AWS (SQS/Lambda/SES)

Nigel, Multi-tenant admin backend for a restaurant management platform; powers management of franchise brands, restaurants, menus, and pricing across concepts. 02/2024 - 01/2025
Kotlin, Java, Spring Boot, REST APIs, PostgreSQL

MyCitroën Connect , Connected vehicle application for Citroën EV and ICE cars. 03/2022 - 02/2023
Android SDK, iOS SDK, Okhttp, Retrofit, Alamofire, Firebase, APNS, Google Map APIs

TetraVX nVX , A multi-channel cloud based VoIP client for enterprise customers of TetraVX. 07/2017 - 02/2022
Linnphone, Android SDK, iOS SDK, Couchbase Lite, APNS, CallKit, Firebase, Deep Linking, REST APIs

Search Processor, REST Client to deliver reporting functionality for enterprise customers. 03/2021 - 02/2022
Java, Spring Boot, Elasticsearch, REST API

Direct Sports Network , OTT app for sports content of Ice Hockey, Football, Nascar. 01/2016 - 06/2017
Android Leanback SDK, Amazon Fire TV SDK, REST API, Media Streaming, Custom Ad streaming

Polycab Connect , Royalty program to reward registered dealers, distributors and retails. 01/2017 - 06/2017
Flutter, Dart, REST API, Push notifications
